I build design practices that sit inside the product: strategy, craft, and the connections between product, engineering, customers, and the business. I hire and develop builders, hold the quality bar, and make the ROI of design visible through activation, adoption, and shipped outcomes.

EXPERIENCE

CapIntel
Nov 2024 – Present

Permanent Full-time · Montreal, Remote

Director of Product Design
Sep 2026 – Present

- Own product design strategy and grow a team of designers who operate as builders across the full product lifecycle.
- Connect design, product, engineering, customers, and the business around measurable outcomes, not preference.
- Hold the bar on craft while making the ROI of the design practice visible to the company.

Principal Product Designer
May 2026 – Sep 2026

- Set design direction across onboarding, advisor workflows, AI-powered experiences, and enterprise systems used by wealth firms.
- Partnered with product and engineering through launch so complex, multi-product surfaces shipped with a shared quality bar.

Senior Product Designer
Nov 2024 – May 2026

- Owned advisor activation and time to first value. Built the analytics product and engineering used to measure activation and adoption.
- Established reusable patterns and replaced preference-based design reviews with arguments tied to a business outcome.

Design Table
Apr 2025 – Present

Co-Host · Weekly conversations with operators on SaaS adoption, activation, and revenue

- Co-host with Nick. A weekly show for product leaders on the decisions that actually move adoption and revenue.

Notch
Mar 2024 – Oct 2024

Senior Product Designer · Toronto, Remote

- Led the payment portal that made a payment method required before invoice access. On-time payments went up 30%.
- Replaced a supplier-driven billing process with self-serve so customers could manage invoices, methods, and plans without a ticket.
- Designed the error handling and business logic for a Stripe to Adyen migration with no broken payment days.

EXPERIENCE, CONTINUED

GlobalVision
May 2020 – Mar 2024

Founding Product Designer · Montreal, QC

- Founding designer on Verify, the automated proofreading product for pharma, medical, CPG, and agencies. Hit $1M ARR in year one.
- Owned the product experience from beta through launch, including the design system and the working model between design and engineering.
- Ran the research program with actual clients so the quality bar scaled with the team, not against it.

Stradigi AI
Mar 2016 – May 2020

Montreal, QC

Director of Product Design
Feb 2018 – May 2020

- Built and led the design practice. Set design strategy for AI products across the company, not a single surface.
- Hired and led a small team through research, systems, prototyping, and shipped work. The company raised $53M CAD Series A to expand in North America.
- Owned art direction across the platform and got design, marketing, and engineering working from the same plan.

Product Designer
Mar 2016 – Feb 2018

- Designed mobile, web, and internal products during the agency-to-SaaS pivot. Built the reusable patterns that became the design system.

JoMedia Inc.
Nov 2014 – Mar 2016

Content Marketing Manager, then Web Designer · Montreal, QC

- Increased conversion on product landing pages and checkout by 20%. Led design across physical and digital products for Everyday Happy.

Beezid.com
Sep 2010 – Nov 2014

Lead Web Designer, then Junior Web Designer · Montreal, QC

- Grew the user base from 1.5 million to 3 million. Wrote the HTML and CSS, owned conversion on the pages that made money, and shipped on time.

LEADERSHIP

Design leadership · Practice building · Hiring and developing · Product strategy · Cross-functional alignment · Outcome-based reviews · Activation and adoption · Design systems · AI product experiences · Enterprise SaaS

EDUCATION

University of Ottawa
BA, Psychology

Self-taught designer
HTML, CSS, and product design since 2010
